

IMMERSEME LANGUAGE PROJECT

St. Joseph High School, Trumbull

2020-2021
PROJECT UPDATE

Grant Amount: \$4,000
Project Cost: \$4,000

100 Students Impacted
Grades 9-12

PURPOSE: To pioneer a Virtual Reality classroom in language learning through the ImmerseMe app. The program gives students the opportunity to communicate effectively in a virtual reality where the student will experience being in specific location speaking with native speakers, without ever leaving the classroom. The students have an opportunity to converse with the virtual person in the target language, providing a more comfortable way to help the student speak more.

IMPACT: With the ImmerseMe app, students were able to better communicate with peers and teachers in the target language. In addition, it helped students gain confidence when speaking the language and teachers were able to better guide students towards proficiency.

FUTURE PLANS: This program will continue if we find other fundings for it.
