

PUTTING THE A IN STEAM

St. Joseph High School, Trumbull

 2020-2021 
PROJECT UPDATE

Grant Amount: \$10,000
Project Cost: \$10,944

85+ Students Impacted
Grades 10-12

PURPOSE: To improve the Fine Arts program with modern technology, techniques, and strategies. With the purchase of Macbook computers and the newest Adobe Suite software, we modernized the Graphic Design program. The students were able to use the most up-to-date technology and learn on the software that are used in both marketing, advertising, and various other professional fields.

IMPACT: This grant allowed our students to show off their creativity and sophistication in not only graphic design, marketing, and business classes but also in other classes that called up creativity and innovation. The students learned that with the right tools at their disposal - the sky is the limit!

FUTURE PLANS: This program will continue as we are starting to build a digital arts program at St. Joseph High School. Teachers want to be able to tap into these students' abilities to enhance the lessons across other disciplines.
