

# SUCCESS WITH SMART TELEVISIONS

St. James School, Stratford

2020-2021  
PROJECT UPDATE

Grant Amount=\$2,800  
Project Cost=\$2,800

17 Students Impacted  
Preschool

**PURPOSE:** To purchase a Smart TV for the preschool class. The goal was to provide more differentiation of curriculum through the use of multi-media enrichment and enhance the way children engage with the materials and curriculum in the classroom.

**IMPACT:** The students now have more activities to strengthen their understanding of lessons and they have even more opportunities for fun auditory discrimination games, dance and movement. Movement and science have been greatly enriched by the abundance of fun interactive videos that are available with the Smart TV. Concepts which are not readily available to display in the classroom are now available to see with the technology. For example, we were not able to go on our farm field trip but we watched videos about farm animals and crops that allowed the children to see and hear the daily experiences on a farm.

**FUTURE PLANS:** The technology will continue to provide young children with sensory and movement activities that enrich their experience and understanding of new concepts.
