

# OWL LABS

Holy Trinity Catholic Academy, Shelton

## 2021-2022 PROJECT UPDATE

**Grant Amount: \$11,000**  
**Project Cost: \$11,068**

**180 Students Impacted**  
**PreK - Grade 8**

**PURPOSE:** To purchase a Meeting Owl Pro from Owl Labs for each of the classrooms. This product is a 360 camera, microphone, and speaker in one device. The Meeting Owl Pro provides a panorama view of the classroom, so students who are distance learning have the same view of the classroom as students that are learning in person. The camera also focuses on the speaker, so teachers would be able to utilize the tools in their classrooms, such as whiteboards, chart paper, and manipulatives.

**IMPACT:** The quality of distance learning lessons provided have improved. Students can effectively hear their teachers and screens can be shared. Students that are on distance learning have had improved academic performance. They have a better video experience, which leads to feeling like they are in the classroom. The Meeting Owls have also brought us together as a school community. We have used them throughout the school year to broadcast events to each classroom, such as monthly Rosary services, Advent prayer services, and honor roll ceremonies. We have also used the Meeting Owls to share school events with families such as the 8th grade pin ceremony.

**FUTURE PLANS:** The Meeting Owl Pro cameras in our classrooms will continue to be used.
