

# ENHANCING FUTURE LEARNERS WITH LITETOUCH INTERACTIVE TOUCHSCREENS

Holy Trinity Catholic Academy - Shelton

2022 - 2023  
PROJECT UPDATE

Grant Amount: \$9,370  
Project Cost: \$9,507

60 Students Impacted  
PreK, Grade 1, Grade 3

**PURPOSE:** To enhance the personalized learning environment which our students are already immersed in. This technology empowers our teachers with the very latest smart and virtual teaching method tools to strengthen the theoretical and practical academic foundation that supports an interactive, engaging, and fun learning atmosphere in the classroom.

**IMPACT:** The interactive TVs have made a difference in the quality of our lessons. The technology is used across the curriculum in language arts, math, religion, science, and social studies and enables teachers to model student assignments. It turns all software, web pages, and apps fully touch-capable, making our mini lessons more productive and the interactive display provides engaging ways to drive student learning. It is most helpful to our tactile and visual learners. The students get excited to use the touchscreen and have immediate feedback to their learning.

**FUTURE PLANS:** We will continue to use the interactive touchscreens. Almost every curriculum program we use comes with an online component and we learn new features each day. Having the touchscreen definitely keeps our school up to date and innovative.
