

EXPLORING SCIENTIFIC WONDERS IN KINDERGARTEN

St. Rose of Lima School - Newtown

2022 - 2023

PROJECT UPDATE

Grant Amount: \$1,500

Project Cost: \$1,575

22 Students Impacted
Kindergarten

PURPOSE: To purchase a science table and stools, complete with goggles, lab coats, and microscopes to enable hands-on learning in Kindergarten.

IMPACT: Each child was able to utilize the Science center a few times a week, if desired, and a formal Science lesson was taught each Friday. The children enjoyed the hands-on learning and donned their goggles and coats and got right to work. The children have found it to be one of their favorite areas in the classroom. It is very user friendly which enables a love of Science to grow within each student. The children were much more engaged during Science lessons. They returned home quite excited to explain what we did in Science that day.

FUTURE PLANS: It was a wonderful addition to the Kindergarten curriculum and will be for years to come. We will continue look for avenues to continue building our Science empire!
