

LEARNING CENTER SUPPORT LAB

St. James School - Stratford

2022 - 2023
PROJECT UPDATE

Grant Amount: \$5,000
Project Cost: \$8,651

215 Students Impacted
Grades K-8

PURPOSE: To give every student, regardless of how they learn, the same opportunity to receive the best education possible. The Learning Lab continues to be a hub for assisting those students whose learning styles may differ from their peers.

IMPACT: By offering two support centers we are able to offer quality one-on-one and small group intervention. We have noticed that students who are receiving enrichment are able to be more engaged in their learning which equates to higher achievement in the classroom. Furthermore, students who require remediation are getting the foundational skills and closing the gaps that allow them to be more successful with their peers in their general education classes.

FUTURE PLANS: Since we have seen great success with our Learning Center Support Lab, it will be an ongoing expense as new technology comes out. We will also continue to investigate the best ways to use technology to intervene to help our students succeed.
