

# PODCAST 101

Immaculate High School - Danbury

2022 - 2023

## PROJECT UPDATE

Grant Amount: \$2,500

Project Cost: \$2,595

16 Students Impacted

Grades 9-12

**PURPOSE:** To teach the fundamentals of podcast production and distribution. We purchased the RodeCaster Pro II USB Audio Interface along with microphones and headphones. The purpose, process, and execution of a successful podcast was to be emphasized throughout the year, along with a stress on factual research and proper public speaking skills.

**IMPACT:** Students acknowledged the importance of grammar, punctuation, and the need to detail their work. An emphasis on gathering the correct information was stressed as well as the importance of studio professionalism. Scripts were written for podcasts that advertised several school events and the class produced a series entitled "Inside Immaculate" that highlighted students, faculty, parents, and alumni of Immaculate High School. Student podcasts released by our marketing department have been very well received by parents, staff, and fellow students.

**FUTURE PLANS:** One Podcast class was offered this year but two classes composed of 12 students each will be offered next year. The grant funds have provided modern recording equipment that, if cared for properly, will sustain into the foreseeable future.
